Local Happenings

Monitor Sports Day, June 30.

M. Barker is having a store erected at Pemukan. He will carry a stock of groceries, etc., and will be ready for business about June 1st.

H. W. Weed was a visitor at Noble Farm, Nobleford, last week.

Messrs Gillam, McGirr and Vanhorn motored to Chinook, on Saturday, returning to town on Sunday afternoon.

Mrs. D. Steen was a visitor at Throne, last week.

W. S. McCulloch spent a few days down in Calgary last week. While in the city he visited the Herald's radio broadcasting station and also heard a wireless phone concert.

H. W. Weed has received the appointment as Organizer for Coronation Constituency for fighting the grasshopper plague and a station for mixing the poisoned bait will be opened at this point. A substation will be maintained at Altario.

H. McCarron is shipping hogs on Tuesday, May 16th. Bring your hogs in early.

The Imperial Ring has started drilling operations again and they are making excellent progress.

Another Syndicate, with headquarters at Edmonton, has entered the local oil field and will commence drilling operations

on Section 19 33-4, nine miles straight south of town. Their machine arrived here yesterday and is being moved out to the new location.

Band Practice every Tuesday night and Sunday afternoons.

Orchestra Practice every Friday night.

No examinations since Easter.

Percentage of attendance 90.3

Percentage during March 9.9

The department requires an attendance of 140 days before a pupil can be recommended for promotion. Up to May 1st, no pupil had fulfilled the requirements.

Two scholars, Leita Cramer and Gladys Akre, have each attended 320 days without being tardy since I came to Monitor.

Average daily attendance for

both rooms during April 59.96

Average attendance during April 1920, 29.6, gain of 103% in attendance. Some gain!

W. F. Hargrove, Teacher

At the annual meeting of the Board of Trade, L. E. Larder was re-elected as President for the ensuing year. The other officers are: G. Lucas Vice-Pres., L. O. Gould Secretary, and J. C. Matheson Treasurer.

The yearly membership fee is \$1.00; hand yours in at the Bank or too any of the officers.

The next meeting of the Board will be held on Monday evening, May 15th.

It is hoped a goodly number will attend this meeting.

LAND FOR SALE

THE SOLDIER SETTLEMENT BOARD OF CANADA

Offers for Sale by Public Tender:
West Half (W $\frac{1}{2}$) of Section Twenty-five (25) Township Thirty-four (34) Range Six (6) West of the Fourth Meridian.

Terms of sale to duly qualified soldier settlers are 10% of the purchase price in cash on acceptance of the tender, and the balance in twenty-five equal, annual instalments, with interest at 5% per annum on the amortization plan.

To civilians the terms of sale are 20% cash and the balance in nine equal, annual instalments, with interest at 6% per annum.

Each tender must be accompanied by an accepted cheque for 10% of the tender offered. If tender is accepted, this sum will be credited to the purchase price of the land. If tender is not accepted, the money will be returned to the tenderer.

Tenders will be opened Monday, May 22nd, 1922.

The highest or any tender not necessarily accepted. If the land is not sold on the date above mentioned, the Board will be prepared to receive tenders to purchase until such time as it is finally disposed of.

Tenders should be in plain envelopes marked "Tender for the purchase of W $\frac{1}{2}$ 25-34-6-w-1" and addressed to:

The District Superintendent,
SOLDIER SETTLEMENT BOARD
Calgary, Alta.

Dated at Calgary, Alberta,
this Fifth day of May, 1922.

NOTICE

To the Ratepayers of the Monitor School District

A 10% discount will be given for payment of 1922 taxes on or before May 22nd, 1922. Make payments at Canadian Bank of Commerce.

Look for this Trade Mark when You Buy Kitchen Utensils

Would you buy a can of salmon if it had no label? Or a bag of flour? No, certainly not! Then be just as careful when you are buying kitchen utensils. Purchase only those articles of Enamelled Ware carrying the **SMP** trademark. It is your safeguard and your guarantee of quality. Ask for

SMP or Pearl WARE

Diamond Ware is a three-coated enameled steel, sky blue and white outside with a snowy white lining. Pearl Ware is a two-coated enameled steel, pearl grey and white inside and out.

A Gratifying Change

There has in times past been so much bitterness in Canada's party politics, and such a pronounced tendency for the leaders of one political party to refuse to see anything good in the policies and actions of the opposing party, that it is not only gratifying, but decidedly encouraging to note the change for the better which has taken place in recent years, and which is becoming more pronounced.

A pleasing manifestation of this was given a few days ago when, addressing one of our Western Canadian Clubs, Hon. H. H. Stevens, who was a Minister in the Meighen Government, frankly stated that he believed the King Government was honestly desirous of helping the farmers of Canada in their present difficulties and was earnestly seeking a way whereby practical assistance could be rendered the agricultural industry.

It is gratifying to remember that the proceedings of the Parliamentary Committee investigating the problem of wheat marketing indicate that the members, in giving consideration to this large and vitally important subject, are not trying to make party capital for themselves, end-to-place their political opponents in a false light, but are sincerely striving to evolve a policy and devise ways and means which will be practical and provide for the removal of present disabilities imposed on agriculture, and give to the producer of grain a reasonable guarantee that he will receive the largest possible financial return for his labor.

It is from the purely Western and the large national standpoint the attitude now being displayed towards agriculture is most encouraging, and holds promise that the same patriotic and business-like views will prevail when Parliament is called upon to deal with other great national questions in the wise solution of which is bound up the welfare and prosperity of the people of this Dominion.

And why should this bigger, better, national viewpoint not prevail in our national Parliament? Considered in the mass, the Canadian people, while not particularly interested in the internal affairs of the country, are not necessarily uninterested in the organization and policies of political parties, are not rabidly partisan and more concerned in the fortunes of a political party than in the good government of the country and the wise administration of Canada's affairs.

There was a time when it seemed to be the accepted view that when one party announced its policy on a given question, whether that party be in office or in opposition, there was only one thing for the other party to do, and that was to oppose that party and its policy. This is not the case at all. Fortunately for us, that time now seems to have largely passed, and today political leaders are becoming more and more willing to acknowledge the good features of their opponent's policy and to show a readiness to co-operate in further strengthening such policy and carrying it into successful operation.

In these difficult and trying times through which the whole world is passing, it is not partizan, super-critical government that Canada requires, but patriotic, constructive co-operation by all members at Ottawa, regardless of their party affiliations, for the welfare of the Dominion, and for the promotion of the Dominion wise, sane, business-like administration. Let there be no suggestion, and criticism and even opposition when it is called for in the public interest, but the main guiding motive of Liberals, Conservatives, Progressives and Labor needs to be the advancement of Canada's highest welfare and the sound development of national policies with a view to the happiness of the Canadian people and the enhancement of the prosperity of the country at large.

Feed the body well

Right food for the body is more important than right fuel for the engine.

Grape-Nuts

Young Scientists Needed

Pulp Industry Requires Trained Men to Solve Problems

Here are a few of the problems faced by the men in the paper and pulp industry in Canada.

They have heavy losses every year as a result of the decay of wood in storage. Also some mills now have to haul their logs long distances. Also, and this is not generally known, the pulping processes have been only slightly improved in the last fifty years.

The value of the industry will be increased at least 25 per cent. when all these problems are solved, but a great deal more intensive scientific investigation is necessary in connection with each one of them.

An effort to supply the deficiency in trained men is being made by the Council for Scientific and Industrial Research of Ottawa. Arrangements have been made to award 7 Fellowships, 9 Studentships and 29 Bursaries among men who are taking scientific courses, and it is hoped that among them may be found suitable scientists who will devote themselves to the solution of the problems of the pulp and paper industry among others.

HIS NERVES NOW STRONG AS EVER

How An Ontario Teacher Regained Good Health

"I am an Ontario teacher by profession," says Mr. James R. Thomson, R.R. No. 1, Clinton, Ont., "yet while I was still school teaching I was in very poor health. I suffered a nervous breakdown, brought on by over-work and no relaxation. I was unable to think, to act, or even to eat properly. Queer little prickly sensations were continually running up and down my back, my arms and my legs. I was so weak, I could not get up from a chair without help, and often my heart was thumping like a trip hammer. I determined to consult our family doctor, and he immediately put me under orders. I had to give up my school and return home in order to recuperate my health. I was his chief concern. He gave me a drink quart of it; yet, though it helped me, it did not build me up to my normal condition — something was missing; something my system was calling for, better blood. One day, I saw an advertisement in the newspaper, across an advertisement of Dr. Williams' Pink Pills suggesting just what was needed in my case — new, rich, red blood. I immediately sent for a box, and when the doctor visited me, I told him I had decided to try Dr. Williams' Pink Pills and he seemed satisfied. By this time my box was nearly done, and I determined to get another, by the time I had finished this I was gradually coming back to normal. My strength was returning, I could sit and walk without strain. For the last few weeks I continued to take the pills, and they were working wonders with me. My head was becoming clearer, my memory better, and my nerves were becoming steadier. I began to go out frequently, enjoying myself. My appetite improved, and I was stronger than before I had my breakdown. I was myself again. I got back my school, and to this day I have had no return of the trouble, and now when anyone comes to me with nervous trouble, I instantly suggest Dr. Williams' Pink Pills as a remedy, as I believe that they did in my case they will do for others."

Dr. Williams' Pink Pills can be obtained from any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

Will Keep Canada's Money at Home

Treatment of Canadian Ore Will Establish New Industry

Realising that Canada has been paying annually millions of dollars for steel products purchased in the United States, and that steel plants in the interior of Canada have been dependent upon the United States for their supplies of iron ore, the Council for Scientific and Industrial Research at Ottawa has been investigating the native iron ore resources, and has secured reports from its committees to the effect that it is time to undertake the special treatment which the Canadian ores required to fit them for commercial reduction to pig iron. It is hoped thereby to establish a new and important home industry.

A composite flag, representing the national colors of the United States, Great Britain, France, Belgium, Italy and Japan has been placed upon the grave of the British unknown warrior in Westminster Abbey.

ROYAL YEAST CAKES

MAKE PERFECT BREAD

AN IMPORTANT PRODUCT OF CANADA

Bread is the finest food on earth. The one food that everybody eats that everybody likes, and that agrees with everybody.

Bread made in the home with Royal Yeast Cakes tastes better, keeps fresh longer, and is more nourishing than any other.

Moisture Conditions Best in Years

Moisture conditions over the prairie provinces are perhaps the best for ten years, according to the preliminary report of the Grain Trade News. The report further states that the supply of labor, as regards number, can be said to be quite satisfactory, with wages running from as low as \$26 up to \$45 a month for good men.

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has been highly advertised by extraneous statements. It claims to cure asthma indeed, when judged by the benefits which it performs. Expect real relief and permanent benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so called remedies have utterly failed.

Many temples in China are provided with a bell at the entrance and when a worshipper enters he gives the rope a pull to ring the bell in order that the gods may be notified of his coming and be at hand to attend to his prayers.

Business Improving

Building permits for the first three months of this year for Vancouver, B.C., represent a total value of \$900,000 as compared with \$750,000 for the first quarter of last year.

HOW'S THIS?

HALL'S CATARRH MEDICINE will do what we claim for it — rid your system of Catarrh or Deafness caused by catarrh. We also recommend it for other diseases. HALL'S CATARRH MEDICINE is a liquid taken internally, and acts through the blood upon the mucous surfaces of the body, removing the causes of inflammation and assisting Nature in restoring normal conditions.

Says That Canada Will Lead United States As A Wheat Producer

Canada soon will lead the United States in the production of wheat, declared Senator Calder, of New York, in addressing the Senate in opposition to the St. Lawrence waterway project. He expressed the opinion that the proposed canal was ostensibly for the purpose of carrying Canadian wheat, and pointed out that Herbert Hoover had stated that the United States would become a wheat-importing nation within ten years. In presenting an interesting picture of the possibilities of Canada as a wheat growing country, the senator said the Dominion would develop several times the wheat acreage of the United States.

The peak wheat acreage in the United States," said Senator Calder, "was 75,694,000 acres, reached in 1919, an increase of 35 per cent over the acreage in 1910. Canada's peak was 19,125,968 acres in the same year, an increase of 115 per cent over the 1910 figure. Canada's wheat production increased from 132,000,000 bushels in 1910 to 263,000,000 bushels in 1920, an increase of 100 per cent. The

production of the United States increased from \$35,000,000 in 1910 to \$83,000,000 in 1920, an increase of approximately 33 per cent. While production in the United States increased 33 per cent during the 1910 period, the value of the wheat crop increased 100 per cent, the 1910 value being \$50,000,000, the 1920 figure being \$1,197,000,000. During the same period the value of Canada's crop increased 400 per cent, being \$9,530,000 in 1910 and \$427,356,000 in 1920.

"The average price per acre of the land devoted to wheat in 1920 was \$9.2. The average price of Canadian land now devoted to the production of wheat is \$43."

Senator Calder then read statistics showing details of the relative increase in Canadian and United States wheat growing lands.

"But this is only part of the picture," the New York Senator continued. "Canada has but entered the lists. Its wheat growers have not even begun to fight. There are in Manitoba, Saskatchewan and Alberta 120,894,000 acres under private ownership. The total number of acres surveyed up to January, 1920, was 199,757,000. Of this total approximately 25,000,000 acres are now available for homestead entry. In addition to the surveyed areas there are large tracts in these provinces which have been only partly surveyed. These tracts contain more than 250,000,000 acres."

"A quarter section of land may be obtained as a homestead in these provinces on the payment of an entry fee of \$10. In Northern Ontario a quarter section can be obtained for 60 cents an acre, one-quarter in cash. "Now, here is the question: Granted equal transportation facilities, what will be the result of a contest in which 250,000,000 acres of land, valued at from 50 cents to \$43 an acre, is pitted against 75,000,000 acres of land with an average value of \$92 an acre?"

"Bear in mind that the proposed canal is ostensibly being built primarily to carry wheat. Divorce the project from its aggressive agrarian support and it collapses. I concede that perhaps this canal, if built, may carry wheat, but whose wheat? I ask you. The answer is unescapable—Canada's."

"I will not venture an attempt to prophesy regarding the future of the United States as a wheat exporting nation. Herbert Hoover has given it as his opinion that within 10 years we will have become a wheat importing nation. I neither reject nor accept that conclusion. But I know of no one better qualified to speak on this subject than our able secretary of commerce."

Sciatica's Pains Relieved Quickly By Nervilene

In bringing quiet relief to the Sciatic Sufferer, the best remedy is frequently the use of Nervilene. Thousands have proved its success. Nervilene penetrates deeply, every drop rubs right in. The irritated nerves are soothed and the pain goes away. Wherever there is Rheumatism, Neuralgia, Lumbo or Muscular Pain, the quickest relief always comes from the use of Nervilene, 35¢ at all dealers.

Poultry Performance Record

Improvement Shown in Egg-Laying and in Number of Entries

That the record of performance in egg-laying established by the Poultry Division of the Dominion Livestock Branch, is appreciated is indicated by the increase both of breeders and entries for 1920-21 compared with the number entered in 1919-20. In the latter year the entries were 4,362 breeders and 7,511 birds. Quebec shows, according to the second report just issued, the largest increase in the number of breeders, and Ontario and British Columbia show the greatest increase in birds entered. The report indicates that the breeds most favored by British Columbians are Leghorns and Wyandotters, and by Ontario, Leghorns, Plymouth Rocks and Wyandotters. Quebec's fancy is for Plymouth Rocks and Rhode Island Reds. New Brunswick, Prince Edward Island and Saskatchewan also favor Plymouth Rocks. British Columbia stands well ahead in the number of birds qualified for the record, Ontario coming second, Quebec third, and Saskatchewan fourth. Considerable improvement in this respect is shown in the second year compared with the first.

Certificates are issued for all qualified birds laying no fewer than 150 eggs in 62 consecutive weeks, with advanced certificates for birds that lay over 225 eggs in the same period, providing the quality of the eggs is not lower than the grade specials in the Canadian standard for eggs and that they average at least two ounces in weight. British Columbia again shows advantage to the advanced qualifications, with Ontario and Quebec following, with New Brunswick fourth, and Saskatchewan and Prince Edward Island tying. In British Columbia, 96 Single Comb White Leghorns granted advanced certificates, averaged 238.32 eggs per bird in the 52 weeks; 42 Wyandotters, 242.17 per bird; and 25 Barred Plymouth Rocks, 241.17 per bird. In Ontario 44 advanced Leghorns laid an average of 245 eggs per bird in the 52 weeks, 27 Plymouth Rocks 234.16 per bird, and 18 Wyandotters 233.13 per bird. In Quebec 10 advanced Plymouth Rocks averaged 235.2 eggs per bird, and 6 Rhode Island Reds 235.3 per bird.

Ladies Remove Their Corns In a Very Simple Way

No pain, no trouble, costs only a quarter. It is a very simple thing to paint on a small application of good old "Putnam's" night and morning. To remove corns, to get entirely free from them, use Putnam's Corn & Wart Extractor. It is guaranteed, 25¢ at all dealers. Refuse a sub-

New York Found in Switzerland

Little Alpine Hamlet Near Lucerne Has Fifty Inhabitants

A peasant handed in a telegram of a few words at a branch telegraph office for his wife in New York and placed a franc on the counter for payment. The clerk asked whether the wire was really meant to be sent to New York, and proceeded to make the calculation. When the comparatively large sum required was announced to the peasant he protested loudly and insisted that New York was in Switzerland.

And so it was found to be, but it took long and patient search through a large ancient volume to discover that there is a New York in Switzerland, a little Alpine hamlet of 50 inhabitants not far from Lucerne.

Etymological Bigotry

"How d'yer like yer new boss, Mame?" asked one stenographer of another on the elevator. "Oh, he ain't so bad, only he's kind of bigoted."

"What yer mean, bigoted?"

"He seems ter think that words can only be spelled in his way."—Boston Transcript.

The largest insect known, but now extinct, was a dragonfly, which had a wing-spread measuring two feet.

TO REMOVE BAD COLD MEDICINE NOT NECESSARY

The Balsamic Vapor of "Catarrh-zone" When Inhaled Quickly Dispels Colds

Every breath you draw through Catarrh-zone Inhaler fills the whole breathing apparatus with pure piney vapors that dispel the cold at its very beginning. You experience a pleasant sensation of relief at once. Soreness, congestion and irritation leave the nose and throat, the head is cleared and every trace of cold and Catarrh disappears. Catarrh-zone is so pleasant, such a safe remedy for winter colds, that you can afford to do without it. Get the dollar outfit, it lasts two months; small size, 50¢; triai size, 25¢, at all dealers or the Catarrh-zone Co., Montreal.

Mystery of the Lightning Bug's Light

Wireless Operator Says It Is Caused by Radio

The mystery of what makes the lightning bug light has been solved and the answer is radio. Hamilton Bailey, wireless operator on the Blackhawk, flagship of the North Sea mine sweeping fleet during the war, declared recently.

Lightning bugs, Bailey said, are equipped with miniature antenna bulbs and possess a low radio frequency, and a short wave length. Radio waves generated by parent lightning bugs equipped with broadcasting apparatus cause the lightning-like flashes, he asserted. Each bug is equipped with its own antennae, the long feelers or whiskers, serving as the aerial, according to Bailey.

Of the Scottish cities, Glasgow's population is now 1,024,669, an increase of 25,542 on 1911, while Edinburgh's stands at 420,267, a decrease of 3,779.

Pimzie Finds Something Interesting

As you know, Pimzie is the most adventurous of the Fairies from Brunswick. He grows restless every day and then comes along with this feeling, commands him, one idea is to be up and away, where he can learn things and make new friends, and have strange experiences and lots of fun. As usual, he had again wandered from his End-of-the-Earth home, and he was having a perfectly beautiful time amongst some rocks near the seashore. He had been playing in a pool of water when he was suddenly aware that he had been completely covered had it been high tide; and the rocks were fully exposed with pools between them; here and there were bare stretches of sand, making a wonderful place to play. So it could hardly seem surprising that Pimzie was not only having a glorious time but that he was gloriously wet. . . . any small boy would have been the same, and when all is said and done, Pimzie is a small boy. The little fellow had been playing in the water when he had come across such as I know! He looked reflectively at his suit for it was soaked and full of water that it felt heavy . . . even his hat was wet! He was quite sorry, for these were his new clothes that Stella's Darning Needles had made him, and the hat was the one he was so fond of; for the one with the red tassel.

As the sun was warm he decided to strip and stretch his clothes on a high rock to dry. No one thought of that idea! In less than a minute Pimzie was quite rid of his clothes and swimming around one of the shallow pools between the rocks. He himself is so little that he didn't frighten or even disturb the countless tiny sea creatures sharing the pool, for they looked upon him almost as one of themselves. I suppose there are so many different kinds of creatures of the sea and sand that a new one more or less never surprises the others. Of all that the Brownie saw, none amused him more than the Hermit Crab. Pimzie had never seen the like around him. All that a Hermit Crab needs for a fight is to run against Hermit Crab! The mere sight of one another seems to enrage them so that they immediately engage in furious battles, and Pimzie watched one fight after another. "Gracious!" he at last exclaimed to himself. "They certainly are a rowdy lot! I wonder what all the fighting is about." And after a little while he suddenly realized what the trouble was.

Do you know what they were about these tiny Crabs and what the Brownies found out by watching them?

It seems that without meaning to, he had moved an empty shell with his foot, which was the cause of all the excitement. The shell had been empty because the little Hermit whose home it had been was in the act of trying another shell to see if he would like that one better than the one he had been living in. He had outrun his old shell and it had become uncomfortably tight, so that was his way of getting rid of it. He had run across the sand and the Hermit, in a great fright, tried to hush back to the safety of his borrowed shell, for, as you surely know, these tiny little creatures have no shell of their own and to protect their long bodies, which are only covered with skin, they have to depend on their wits as well as their fighting powers to go forth and find some suitable shell.

Next week's story will be more about what Pimzie saw.

Copyright, 1922

Immigration From Europe Shows Big Increase During The Past Year

Canada is rapidly becoming a melting pot for continental European races. As compared with immigration from the British Isles and from the United States for the two fiscal years ending March 31, 1921, the accession of peoples from the continent of Europe showed a remarkable increase. Immigration from that region for year ending March 31, 1921, was 224 per cent. more than that in the year ending March 31, 1920. The increase for the British Isles in the same two years was only 25 per cent. Following are the figures. Year ending March 31, 1920—from the British Isles, 59,603; from the United States, 49,656; from other countries, 8,007; total, 117,336. Year ending March 31, 1921—from the British Isles, 74,263; from the United States, 48,059; from other countries, 26,166; total, 148,477.

In a comparative statement for the years 1919-20 and 1920-21 giving the immigration into Canada, classified as to sex, a larger proportion of males came from the United States than through ocean ports. The influx through ocean ports during the year ending March 31, 1920, according to sex, was as follows: Males, 14,178; females, 37,656; children, 15,847; total, 67,630. In the following year European immigration was divided as follows: Males, 43,047; females, 35,075; children, 19,296. The statements for immigration from the United States show: Year ending March 31, 1920—Males, 26,694; females, 12,851; children, 10,611; total, 49,656. For the year ending March 31, 1921,

Males, 26,761; females, 11,302; children, 8,996; total, 48,665.

Farmers and mechanics head the list of immigrants for the year ending March 31, 1921. Following are the figures, showing the influx according to occupation, and including male, female and children: Farmers or farm laborers—Via ocean ports, 23,716; from the United States, 17,747. General laborers—Via ocean ports, 9,882; from the United States, 7,419. Mechanics—Via ocean ports, 5,612. Traders—Via ocean ports, 5,402; from the United States, 544. Female servants—Via ocean ports, 5,432; from the United States, 1,010. Not classified—Via ocean ports, 35,079; from the United States, 9,614.

Immigration by destination, classified as to provinces, for the year ending March 31, 1921, was as follows: Nova Scotia—Via ocean ports, 3,217; from the United States, 961; total, 4,168. New Brunswick—Via ocean ports, 866; from the United States, 1,017; total, 1,883. Prince Edward Island—Via ocean ports, 49; from the United States, 263; total, 302. Quebec—Via ocean ports, 14,019; from the United States, 7,681; total, 21,100. Ontario—Via ocean ports, 49,103; from the United States, 13,469; total, 63,572. Manitoba—Via ocean ports, 8,289; from the United States, 4,366; total, 12,649. Saskatchewan—Via ocean ports, 7,325; from the United States, 6,057; total, 13,322. Alberta—Via ocean ports, 7,097; from the United States, 10,684; total, 17,781. British Columbia—Via ocean ports, 10,439; from the United States, 4,078; total, 14,517. Yukon Territory—Via ocean ports, 4; from the United States, 109; total, 113.

Chinese immigration for the year ending March 31, 1921, totalled 2,425, and the average for the 10-year period terminating March 31, 1920, was 3,187. Last year's influx showed a decrease of 23 per cent. Japanese immigration dropped off 26 per cent in the last fiscal year, and the average for the same 10-year period as above was 719. Hindu immigration has practically ceased, only 10 having arrived in the last fiscal year. During the last 10 years only 107 immigrated, a yearly average of 10. Of the 2,425 Chinese who came to Canada in the last fiscal year, 1,550 were admitted as exempt from the head tax, and \$55 upon payment of \$500 each. The first head tax of \$50 was imposed upon Chinese in 1885. This amount was increased to \$100 on January 1, 1901, and to \$500 on January 1, 1904.

Following is a comparison of the last two fiscal years on Chinese immigration: 1919-20—Exempts, 181; paying tax, 363; registered for leave, 5,519; total revenue, \$538,470. For 1920-1921—Exempts, 1,550; paying tax, 885; registered for leave, 6,507; total revenue, \$474,332.

Reports Gain in Population

Newfoundland Shows Substantial Increase While Labrador is Going Back

Newfoundland and its dependency, Labrador, has a population of 263,338, according to the figures for the recent census just issued. In 1911, the population was 242,619. The increase was on the island, the number of people living in Labrador having shown a considerable decrease. Denominationally, the population is divided as follows: Roman Catholic, 86,475; Church of England, 84,498; Methodist, 74,334; Salvation Army, 13,051. All other denominations show increase of 12,947; the Anglicans, 5,882; and the Roman Catholics, 5,301.

WHEN WOMEN SUFFER

Look for weakness or ill-health. See if there is not a side ache, headache, restlessness, and the "blues." The signs indicate that you need the gentle assistance of Dr. Hamilton's Pills. This soothing medicine is a great friend to womankind. They are a wonderful relief to constipation, they clear up sick headache, remove wastes and poisons from the system. Give and when you do, Dr. Hamilton's Pills with great success. Thousands use no other medicines and rely solely upon Dr. Hamilton's Pills to regulate the system and keep it in smooth running order. 5¢ each or Dr. Hamilton's Co., Montreal.

LORD LISTER & Zam-Buk

Lord Lister's discovery of antiseptic surgery has saved the world a lot of lives, but it has been left to Zam-Buk to bring into millions of homes the full benefits of antiseptic healing.

Zam-Buk is the great antiseptic healer the world has ever known. Being of a natural vegetable origin Zam-Buk has distinct and positive advantages over old style mineral ointments.

Zam-Buk is a compact and highly refined antiseptic and its antiseptic power many times greater than that of any ordinary salve or ointment. Zam-Buk kills and excludes disease germs, and relieves pain and irritation. It first cleanses the surface and then grows over it new healthy skin. As a first aid dressing for injuries, and for rooting out such troubles as eczema, ulcers, ringworm, abscesses, poisoned warts, etc., Zam-Buk is unequalled. No world ever. It has the high endorsement of Dr. Andrew Wilson and other well-known doctors, surgeons and nurses. 50c. box, 3 for \$1.25, all dealers.

THE WORLD'S ANTISEPTIC HEALER

MY CANADA

11.

Winnipeg,
June 4th, 19—

When Mr. Arnold came home for luncheon to-day he suggested that we should all go out on the river for the afternoon. We went. And the result was my face and arms were burned to a blistery red. I am sure that Canadian sunburn is worse than the English variety. Fortunately for the continuation of my diary, I am not fit to be seen, so under a half-inch layer of cold cream I have gone into retreat for the evening.

I am greatly tempted to describe my adventure in the Pullman sleeping car, but, according to Mary, that is forbidden ground.

Our train pulled into Winnipeg on the morning of Tuesday, May 31st. The negro boy was at hand to bring my coat and to provide me with various belongings without which no Englishwoman can travel. I do not like to think that the courtesy and consideration shown to a lone woman on the Canadian Pacific Railway is entirely due to a fondness for tips;

I'm So Tired

Fatigue is the result of poisons in the blood. So when the kidneys fail to purify the blood one of the first indications is unusual and persistent tired feelings and pains in the back.

Neglected kidney troubles lead to years of suffering from rheumatism or develop into such fatal ailments as Bright's disease.

The kidney action is promptly corrected by use of Dr. Chase's Kidney-Liver Pills—the best known regulator of kidneys, liver and bowels.

Mrs. John Ireland, R.R. No. 2, King, Ont., writes:

"I was a great sufferer from severe headaches and various spells. I tried a number of remedies, but could find no relief until I was advised to use Dr. Chase's Kidney-Liver Pills. These completely relieved me and made me feel like a new person. I am very grateful to Dr. Chase's medicines for what they have done for me, and you may use my letter for the benefit of others."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, all dealers or Edmaston, Bates & Co., Ltd., Toronto.

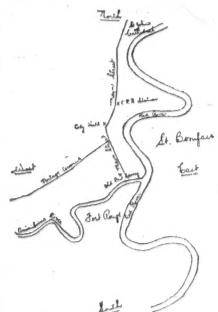

surely the virtue of simple kindness is at least partly responsible.

When Ralph was a small boy, some taste for "buggy" things gave him an illustrated book of "Travels in the Wilds of North America." One picture in it haunted my dreams for years: I showed a man running the gauntlet between two rows of savage-looking Indians. I have not, all these years, the interested spectator of a similar scene, minus the Indians.

As I stepped off the train, a uniformed seraph took my bag with "This way, lady; the gent's just outside," and I followed him across the platform. I wish I had a photograph of the sight when I reached the entrance to the door of the station. From one side of the rounded to the other stretched two rows of people, and between these two rows the incoming passengers ran the gauntlet in the most apid and fearless manner they were recognized by onlookers. The whole distance is probably two hundred feet or less, but it seemed to me to be at least a mile, and I was more than glad to find the Arnolds waiting for me at the door. I had felt sure that I would be safe in their hands, but imagine my joy when I saw not only him but Mrs. Arnold and Mary. I may also admit that I was glad to turn my luggage checks over to Mr. Arnold. Men are useful when all is said and done.

In a few minutes we were in a taxi, and whirling along Main Street on our way to the Arnold home. I had always understood that American cities were laid out strictly according to rule, but it appears that Winnipeg's main thoroughfare was surveyed by a calf. The legend is that in the early days, after the arrival of a calf strayed from the settlement in Kildonan and made its way to Fort Garry—Winnipeg is built on the site of the old fort; the owner followed it on horseback; next day another man in his Red River cart took the same trail, and in the end, the streets of old Winnipeg were duly opened without the assistance of such modern inconveniences as civil engineers, compasses, tape-lines and transit. It is probably unnecessary to add that calves do not as a rule wander in a straight line, and it has not been considered essential to the welfare of the city to make a change. Main Street remains as crooked as on the day the innocent calf broke the trail. It goes against the grain to admit it, but in honesty I have to record that some people assert that the old and followed by the in the notoriously crooked Red River.

The Arnolds have a pretty home in the residential district known as Fort Rouge—this is south of the Assiniboine River. To make my diary complete and to possibly, if I shall insert here a map of Winnipeg and its surroundings, I copied the outline of the rivers and of Main Street and Portage Avenue from a wonderfully well-informed little production known as a "city map." I am sure you will conclude that Winnipeg has but two streets—there are millions of them: I have been trying to find some Wilmington people—but an elaborate map is beyond my skill.

Mary has just been in to advertise my handwork. She asked if it were a Art-Nouveau design for was paper, an impressionist rendering of the Laocon!

But to return to Fort Rouge. With the mind a-thirst for information that is characteristic of the travelling Britisher, I asked where the name originated.

"This is supposed to be the site of one of La Verendrye's forts," replied Mary.

I hope that my complected face hid from her the knowledge that all I knew of La Verendrye might be the name of a brand of face powder. I took the first opportunity to ask Mr. Arnold for enlightenment, but I think it would be a step in the right direction if we were to make ourselves familiar with a history of Canadian history before we leave England. We should do so if we were visiting any other country, you know. I do not mean that we should study Canadian history before visiting any other country. Mr. Arnold has given me a good book on the subject, but I tend to "make good" if I have to lose sleep to do it. Already my British prejudice has received one severe blow with the knowledge that France was largely responsible for the early development of "British" North America.

Ask for Minard's and take no other

Why Castoria?

YEARS ago Castor Oil, Paregoric, Drops and Soothing Syrups were the remedies in common use for Infants and Children; Castor Oil so nauseating as to be almost impossible and the others all containing Opium in one form or another, but so disguised as to make them pleasant to the taste, yet really to stupefy the child and give the appearance of relief from pain.

It required years of research to find a purely vegetable combination that would take the place of these disagreeable, unpleasant and vicious remedies that from habit had become almost universal. This was the inception of, and the reason for, the introduction of Fletcher's Castoria, and for over 30 years it has proven its worth, received the praise of Physicians everywhere and become a household word among mothers.

A remedy ESPECIALLY prepared for Infants and Children and no mother would think of giving to her baby a remedy that she would use for herself without consulting a physician.

Children Cry For

Fletcher's

CASTORIA

Have You Tried It?

Everybody has read the above headline; how many believe it? Have you a little one in the home, and has that dear little mite when its stomach was not just right felt the comforts that come with the use of Fletcher's Castoria? You have heard the cry of pain. Have you heard them cry for Fletcher's Castoria? Try it.

Just help baby out of its trouble tomorrow with a taste of Castoria. Watch the difference in the tone of the cry, the look in the eye, the wiggle in the tiny fingers. The transformation is complete—from pain to pleasure. Try it.

You'll find a wonderful lot of information about Baby in the booklet that is wrapped around every bottle of Fletcher's Castoria.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Pat. H. Fletcher.

U.S. Factories in Canada

Branch Establishments Represent Capital of \$400,000,000

According to a recent statement made by the President of the Canadian Manufacturers' Association, six hundred United States factories now have branch establishments in Canada which represents a capital investment of \$400,000,000 and provides employment for 87,000 persons. Manufacturing in Canada received a great im-

petus during the war and there are now more than 2,000 varieties of articles manufactured in the Dominion that were imported prior to 1914.

\$2,000 in cash prizes

Many people have discovered that 2 in 1 Shoe Polishes are good for other things than for shining shoes. For example:—

2 in 1 BLACK—Good for polishing motor cars; refinishing suit cases; Kodaks, black gloves, rubbers, hats, etc.

2 in 1 WHITE—cake or liquid—Good for cleaning hats, stains in white skirts, white kid gloves, auto tires, etc.

2 in 1 TAN PASTE—Good for polishing furniture, hardwood floors, etc.

For the Best List of New Uses for 2 in 1, We are Awarding Cash Prizes as Follows:

1st award	\$500.00—for the most acceptable list	20 Prizes of \$15.00—for the next twenty
2nd "	300.00—for next best list	50 " " 5.00—for the next fifty
3rd "	200.00—for third best list	50 " " 2.00—for the next fifty
10 Prizes of	25.00—for the next ten	100 " " 1.00—for the next 100 lists

Try to find new uses for any of the 2 in 1 Shoe Polishes, either black, tan, oxblood, or brown paste, white cake or white liquid, black or tan combination.

Write on one side of paper only. List uses according to colors. Awards will be made according to decision of special committee, and payment made on or before October 1st, 1922. All lists submitted to become our property. Address:

Soviet Not Pleased With The Project For Russian Reconstruction

Genoa.—The Soviet plenipotentiaries are not delighted with the project of the powers for the reconstruction of Russia. Such is the brief summary emanating from Soviet sources of the Bolshevik views of the memorandum on which Europe's statesmen have worked so laboriously.

The fact that the document does not mention recognition of the Soviet Government and ignores the suggestion of Governmental loans is said to displease the Communist leaders, who are now meeting in Moscow.

Belgium has not signed the memorandum, and word was received here that France had determined to stand by Belgium.

The financial code at Genoa has been written, declared Sir Laming Worthington-Evans, chairman of the Financial Commission, and he believes it would prove as important as the historic Justinian civil code, the basis of world jurisprudence.

The essential points are limitation of the issue of paper money, fixing parity with gold, economizing the use of gold and co-ordination of gold. The United States, said the chairman, with almost half the world's gold, could join in the future study of the problems without involving itself in political difficulties and could help Europe as well as herself.

The financial report, like the memorandum of the powers to the Russians, emphasizes that assistance to disorganized countries should take the form of private, not governmental credits.

Radio Supplements Telephone

Manitoba Will Enter Radio Broadcast on Business Basis

Winnipeg.—The Manitoba Government telephones system will enter the radio broadcasting business on a commercial basis shortly, John Lowry, telephone commissioner, has announced.

Legislative control of operation of amateur wireless and radio machines will be sought at the next sitting of the Legislature, Mr. Lowry said. The telephone department had under consideration placing a wireless link in the long distance telephone system between The Pas and Swan River, but owing to lack of secrecy it will not be feasible to erect such a wireless connecting link until legislative enactments are passed governing the control of amateur wireless plants so that messages passing between Swan River and The Pas could not be picked up. Utmost secrecy is necessary on the line owing to the important mining messages which would pass over the line, Mr. Lowry said.

SUCH PAINS AS THIS WOMAN HAD

Two Months Could Not Turn in Bed. Lydia E. Pinkham's Vegetable Compound Finally Restored Health

Seattle, Washington.—"I had dragging pains first and could stand on my feet, then I had chills and such pains in my right side and a hard lump there. I could not turn myself in bed and could not sleep. I was this way for over two months, trying everything any one told me, until Lydia E. Pinkham sent me a bottle of Lydia E. Pinkham's Vegetable Compound. I took it regularly until all the hard pains had left me and I was able to be up and to do my work again. The hard lump left my side and I feel splendid in all ways. I know of many women it has helped,"—Mrs. G. RICHARDSON, 4640 Orcas St., Seattle, Washington.

This is another case where Lydia E. Pinkham's Vegetable Compound brought results after trying everything else and had failed.

If you are suffering from pain, nervousness and are always tired; if you are low spirited and good for nothing, take Lydia E. Pinkham's Vegetable Compound. You may not only relieve the present distress, but prevent the development of more serious trouble.

Valuable Ore Discovered

High Percentage Shown by Samples Taken Near Lethbridge

Lethbridge.—Gold and platinum bearing ore, showing a high percentage, have been taken from the West Butte Sweet Grass Hills, southeast of this city, and following closely on the assay reports from Montreal, negotiations were opened with old country capital to interest them in developing the property. Three lots of sample sent to Montreal, show: Class 1, gold, \$493 per ton; class 2, gold, \$250 per ton; class 3, gold, \$83 per ton. Platinum averaged one and one-half per cent.

ACIDS IN STOMACH CAUSE INDIGESTION

Create Gas, Sourness and Pain How to Treat

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to the presence of acids in the stomach and not as some believe to a lack of digestive juices. The delicate stomach lining is irritated, digestion is delayed and food sour, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestents are not needed in such cases and may do real harm. Try laying aside all digestive aids and instead get from any druggist a few ounces of Bisulcato Magnesia and take a teaspoonful or a quarter glass of water with it. Then eat nothing. This sweetens the stomach, prevents the formation of excess acid and there is no sourness, gas or pain. Bisulcato Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and the most efficient form of medicine for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

Asking Funds For St. Dunstan's Memorial

Viceroy of India Expects to Collect Large Sums

London.—The Viceroy of India the Earl of Reading has appealed to all the governors of Indian provinces to organize a collection of funds on behalf of St. Dunstan's Institution for the blind in England to help Lady Pearson found a memorial in connection with the great work her late husband, Sir Arthur Pearson, did for the blind people of the British Empire, according to a Reuter despatch from India. The Viceroy expects large sums to be collected in India. He expressed the hope that India will not be the last in the movement in which the other parts of the Empire are participating.

Expect Rush of Prospectors

Many Mineral Claims Have Been Registered in Manitoba

The Pas, Man.—A great influx of prospectors into Northern Manitoba is looked for during the coming summer and a big advance in the number of mineral claims registered for the present fiscal year is expected. A total of 1,710 claims were recorded at the mines office here during the three years ending March 31, 1922. Of this number \$13 were entered during the last fiscal year and 240 during the month of March. The mines office revenue is estimated at about \$50,000 for the three-year period.

To Place Manitoba Loan

Winnipeg.—Hon. Edward Brown, Provincial Treasurer, left for New York and other eastern points to investigate the condition of the money markets with the view to placing a \$2,500,000 Manitoba Government loan. The loan will be to cover expenditures voted at last session of the legislature.

Genoa.—David Lloyd George, the British premier, was quoted as saying he knew nothing about the reported oil contracts between the Russian Soviet representatives here and the Shell interests, and if true he would not approve of them.

WESTERN EDITORS

J. M. George, Editor of The Times, Deloraine, Manitoba.

Canadian Representative For Washington Is Now Being Considered

Ottawa.—Appointment of a Canadian representative at Washington is now receiving consideration at the hands of the Dominion Government, Hon. W. L. Mackenzie King, Prime Minister, stated in the House of Commons. The Prime Minister's statement was made in reply to urgent pleas by E. M. MacDonald, (Liberal, Pictou, N.S.) that a Canadian minister should be appointed to Washington.

Mr. MacDonald brought up the question on a motion for production of documents "relative to the petition of the Eastern Lahave Transportation Company and others to the

Secretary of State for External Affairs," and replied thereto from the United States Government.

The case at issue, Mr. MacDonald said, was that of a Nova Scotia vessel sunk by an American vessel off Rhode Island. The fault lay with the American vessel, but the Canadian owners, under United States law, could not sue through the courts. They had to act through the secretary for external affairs.

"There should be a more direct method of communication between Canada and the United States than the present one of going through the British embassy at Washington," Mr. MacDonald declared.

In the middle of the front, troops of Chang Tsu-Lin have recaptured Kuan. Wounded men from that region say the fighting was heavy during the past few days, often at close quarters. The tide of battle was continually changing until the arrival of Chang's reinforcements turned the scales.

Quebec Elections in June

Quebec.—Rumors are current here that the provincial general elections will take place in June.

The War in China

Heavy Fighting at Close Range is Reported

Peking.—General Wu Pei Fu, commander of the Chi Li forces, was reported to have arrived near Machang, on the railroad south of Tien Tsin, to take personal command of the operations against the troops of Chang Tsu-Lin on that section of the battle front.

Late reports are to the effect that Chang Tsu-Lin is heavily reinforcing his troops in that region with men of all arms and indications are that Machang soon will be the centre of intense fighting. Artillery duels already have commenced, over a wide front. General Wu, if he actually takes command there, will have facing him the 25-year-old son of Chang Tsu-Lin.

The heavy bombardment that has been in progress at various points has depleted the stores of big gun ammunition and the fighting is now mainly with machine guns and rifles.

At some places there has been a lull in the battle.

Fulness After Eating

If you have fulness after meals, a bad taste in your mouth in the morning, fur on the tongue, flatulence after meals and no appetite, take Mother Seigel's Syrup. It will clean your tongue, renew your appetite, give you relish for food and the power to digest it thoroughly and easily. Sold in 50c. and \$1.00 bottles at drug stores.

Note and Comment

It is understood that several of the oil boys are expecting to stir up the dust on the roads south this year, with very high powered machines. Our local agent here is quite hopeful of turning several deals and of doing repairs. It has been overheard, as coming from good authority, that one of them has even been contemplating the acquisition of ladies bicycles—just what this means we are at a loss to know—it may be to run the poison lines for coyotes or more probably to be in style with Hollywood.

The rise and fall of the tide in the Dry Lakes has given vent to concern on the part of some of the nearby residents. It may be these bicycles are being supplied as "life savers."

The Dry Lakes Beach authorities are seriously contemplating some sort of bell or Gas Alarm to warn those, who may be near, of its rise.

Pick up a grasshopper and observe his features. They are the most idiotic in nature's realm. Not only does the grasshopper's face stamp him as the imbecile of the insect world but his life and his actions verify the judgement. The proverb "Look before you leap," is not in his store of knowledge. He leaps and trusts to luck that he will land safely.

Naturalists tell us that the hopper has not the least idea where his leap is going to land him, and if you will watch him you will be convinced that they are correct. His jump will take him from the green grass onto barren ground, into a puddle or even into a fire. And then he'll kick and struggle to get away from his plight, only to turn around after he is free and jump back into the same place.

There are men who are guilty of the same behavior, and they are supposed to have a full amount of grey matter to call upon. They jump into things without first looking and then struggle, fume and fret because they have such "hard luck." They lose their savings in wildcat speculation, and almost before they are on their feet again take another plunge into this or that fool venture.

Common sense dictates that a person stay in fields with which he is familiar. When he feels that he must exploit other pastures, discretion counsels him to go slow. Many of us would benefit if we took warning from the plight of the grasshopper and make it a rule always to look before we leap, saving ourselves from many

embarrassing and inconvenient situations.

The town of Coronation now possesses one of the finest and best equipped small hospitals in Alberta. At the present time there is a staff of 5 nurses on duty, all fully qualified.

Dr. Brookman has recently installed an up-to-date X-Ray machine, the Doctor having attended the Mayo Bros. Clinic at Rochester.

Local Happenings

The local Tennis Club has reorganized for the 1922 season, and the courts are being overhauled this week.

The School Board is having 2500 poplars and cirmograms put out around the school grounds, this week. These trees and shrubs will make a big improvement to the school property.

The heaviest rainfall that the district has experienced during the last five or six years commenced on Monday night about ten o'clock and there was a steady downpour for fifteen solid hours. Tuesday afternoon and evening continued showery with several hours of steady rain during the early morn on Wednesday. The weather has been rather cool all week and windy. An increased acreage will now be seeded with wheat now that the land has a good supply of moisture.

The local ball team will play at Coopers on May 21st. H. Foley has been signed up to do the hurling for Monitor, he is a southpaw.

Railway News
in Brief

Forestsburg, Alta.—Work was received by C. J. Smyth, convenor of the board of trade's railway committee, that work is being done on the C. P. R. branch from Coronation northward through Bulwark, and that a crew of men is employed fixing up the track work on the bridge a little north of Lorraine.

St. John.—Track work on the C. P. R. main and branch lines throughout the New Hazelton district is commencing now, General Superintendent Goodman advised. He said that in addition to replacement of worn-out ties, there would be laid on the main lines upwards of forty miles of new heavy steel and that upwards of 80 miles of rails will be laid by heavier steel on the branch lines, including the Snore Line.

Fort William.—Over half a million dollars will be spent by the Canadian Pacific Railway on preliminary improvements to their principal docks on Island Number One, at the mouth of the McKellar river. Superintendent Hawkins announced recently that the 1922 estimates included an additional sum for the work, and that construction would start sometime during the end of the present month. The improvement will consist of a huge storing or distribution crane, and general enlargement of the coal handling and storage facilities of the docks.

The Sherwin-Williams Paints Cover the Earth
THE SHERWIN-WILLIAMS STANDARD OF VALUE
FOR EXTERIOR PAINTING :

COST PER GALLON is a false basis from which to measure paint values. Far more important is the quality of the paint.

Judge S. W. P. on that basis and it is the biggest paint value on the market. It covers ONE THIRD MORE than ordinary paints and lasts twice as long and therefore represents a real money saving in actual price as well as in labor cost for painting and repainting.

Come over tonight, Joe and bring the folks"

I'D LIKE to Jack, but I can't make the grade, I have not got a car."

You know what a treat an evening with jovial Jack is—you know how your wife and his—old school girl friends—love to get together to discuss babies, neighbors and lingerie but—you haven't got a Ford.

Make up your mind right now that you are going to put an end to this—that you are going to have all the fun—the recreation—the companionship you have been missing. Before you leave the 'phone give us a ring—No. 3 is our number—and when you hear our terms you will wonder why you have done without a Ford so long.

GRASSHOPPER NOTICE

The Government is anxious to make a thorough extermination of this pest this year, and is establishing a Mixing Station at Monitor. They will furnish the bait, if each district will organize to properly spread same with a responsible person in charge.

For the purpose of organization Big General Meetings will be held at the following places

MONITOR, Fri. May 26

ALTARIO, Sat. May 27

Meetings called at 2 p. m.

Every farmer should attend and plan to save his crop

G. N. JOHNSTON, M. L. A.

will attend and talk on Control of Grasshopper and other Pests, Road Organization, and other Community Matters.

Grasshopper Eggs are being found this year in wider areas and increased quantities

Everybody should report the finding of eggs

H. W. Weed, District Organizer

Fifteen Sturdy Macs Are Now Canada's

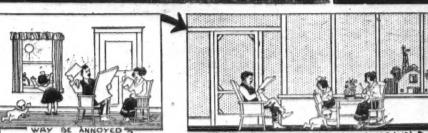

WITH bagpipes skirling and a smile of happy anticipation on every face these fifteen stalwart lads from the Hebrides first set foot on Canadian soil on April 3rd. They arrived on the Canadian Pacific liner "Tunisian," and at once went on to Chatham, Ontario, from where they will be distributed among the farms of Ken County to learn the intricacies of Canadian farming. They are Highland farmers and North Sea fishermen, and the finest type of immigrants Canada can have, and the advance guard of 150 others just as good who will soon arrive.

Every one of them is a Mac—three MacLeans, three MacDonalds, two MacKenzies, two MacTavishes, a MacPherson, a MacIntyre, and a

MacIntosh. To add to the Scotch flavor they were conducted by Father MacDonald, special colonization agent of the Canadian Pacific Railway. All are veterans of the Imperial army or navy, and many have been decorated for bravery during the great war.

They were glad to be away from the land of labor strikes and unemployment, and not even the prospect of a ten-hour day, after their eight hours in the old country, dampens their enthusiasm for Canadian farm life. So far they are very favorably impressed with this country, and have not the slightest notion of ever getting homesick. Later on, when their farm experience warrants it, they intend to buy farms of their own.

**KEEP OUT THE FLIES
LET IN COMFORT**

You owe it to the family to screen your doors, windows and veranda. Your veranda will be your summer sitting room if protected against house flies and mosquitoes. A glassed-in veranda gives splendid satisfaction and enables you to use it practically the year round. See our representative.
